About LUSH

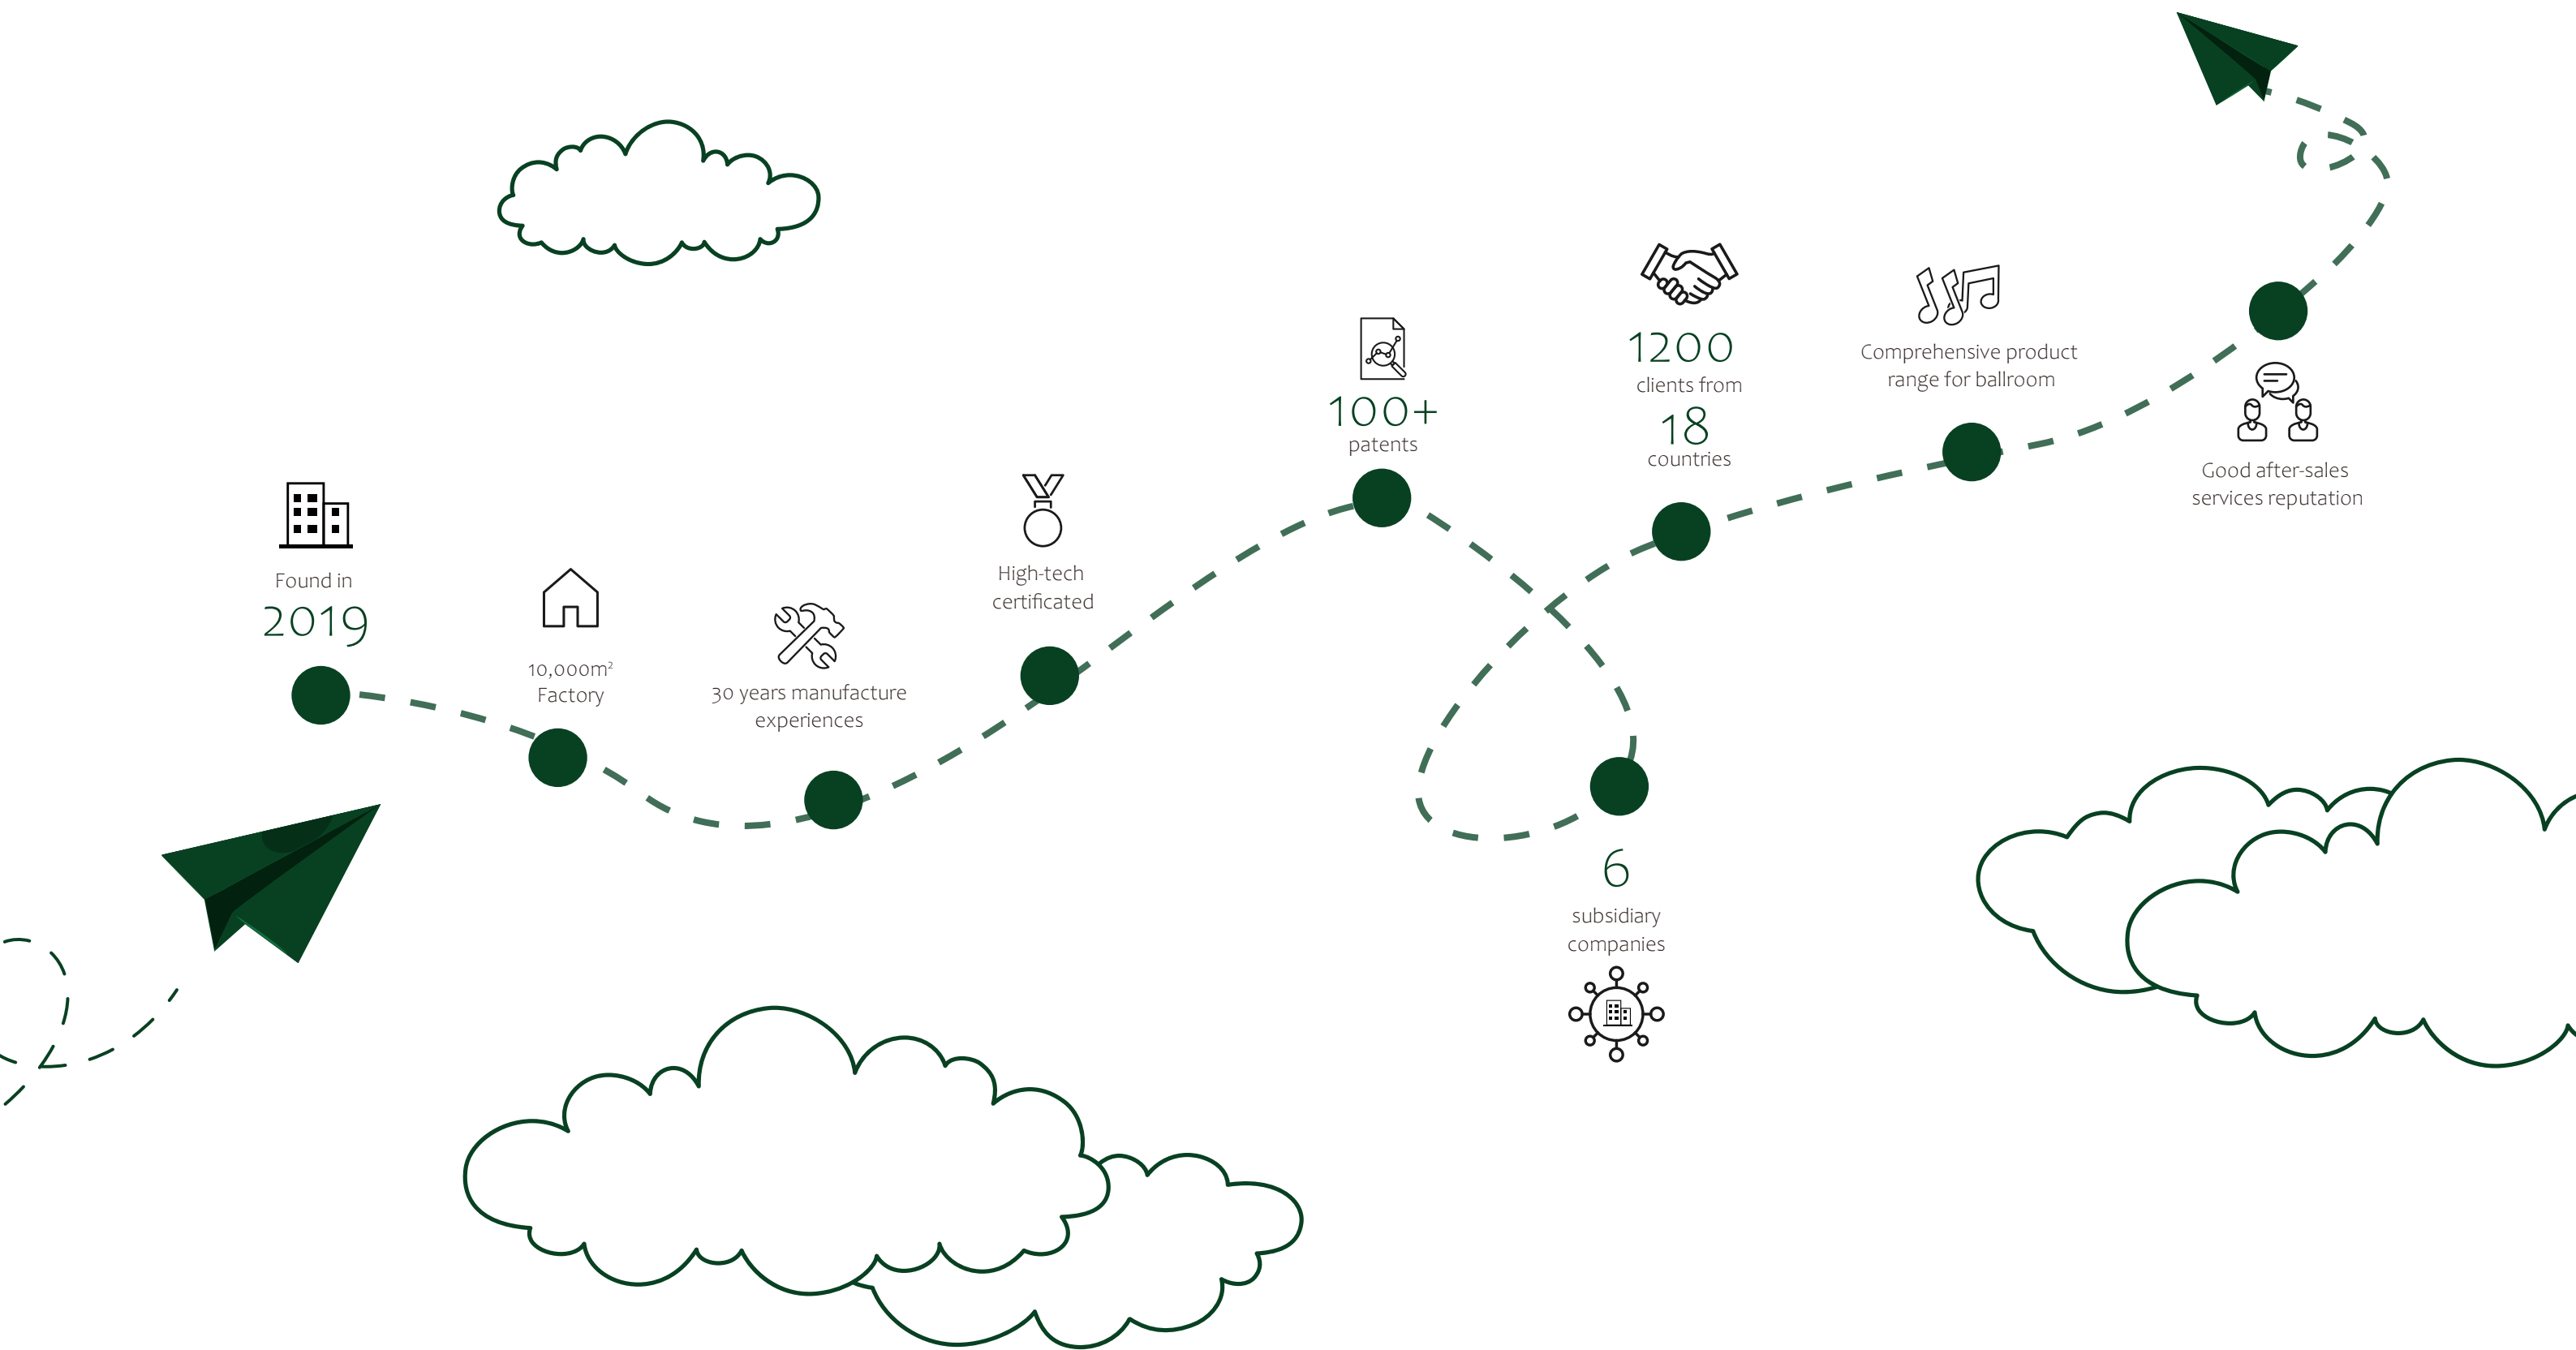

Founded in 2019, as a design brand of GESIGN, LUSH is committed to providing user-friendly and sustainable products to meet the needs of catering and banquet equipment in hospitality.

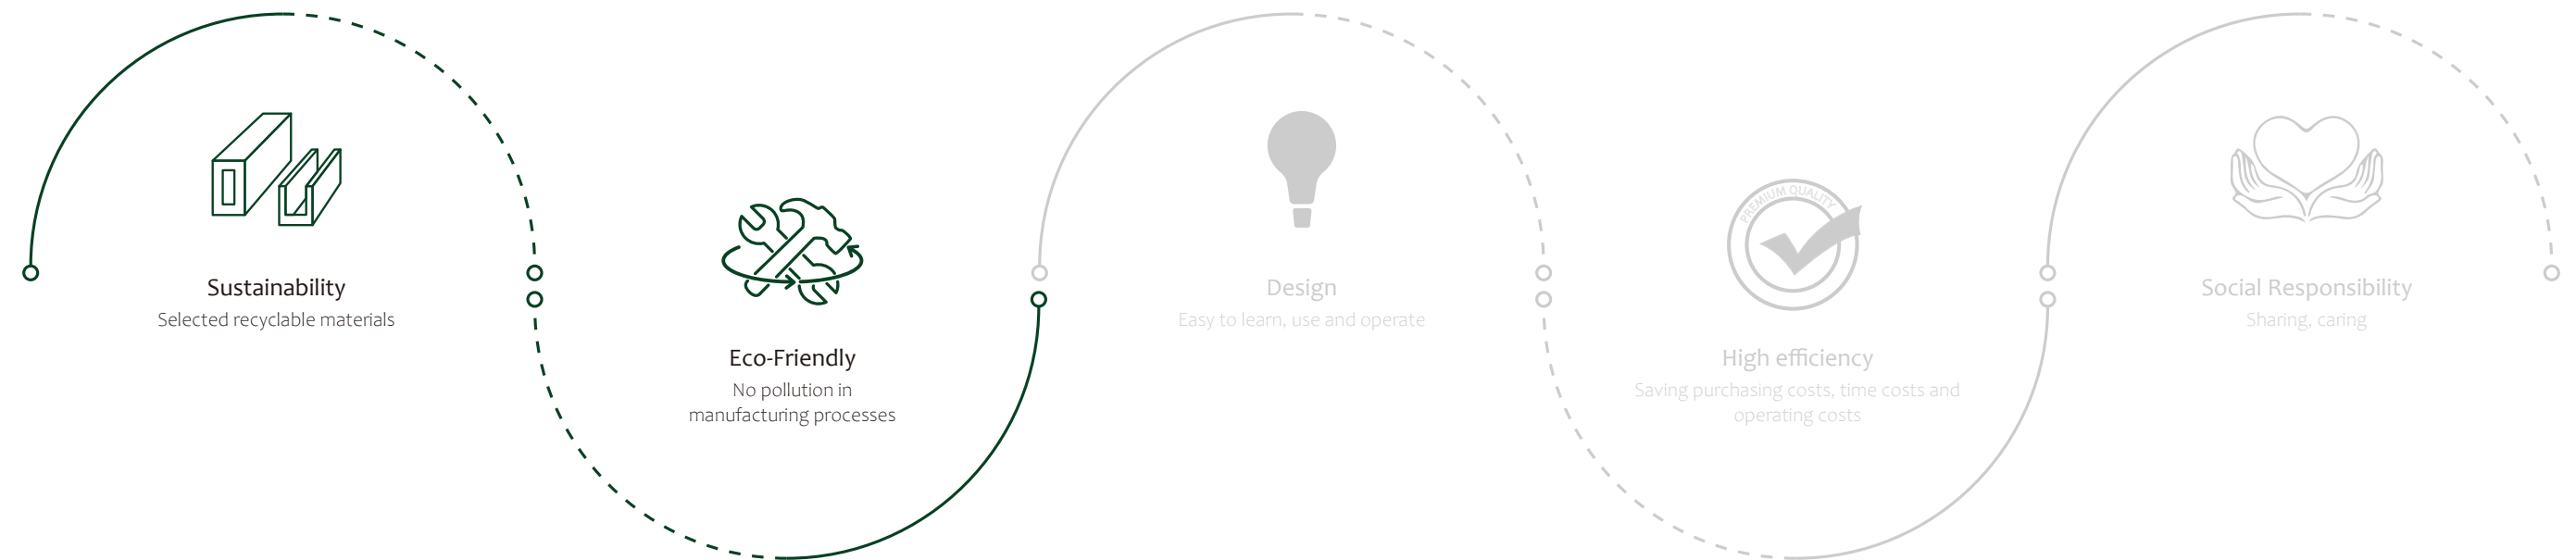

As a manufacturer with more than 30 years of experience in this industry, we have seen significant changes, with more and more customized designs and specific functions being welcomed, purchasing volume is increasing massively. In this process, LUSH noticed something we should pay great attention to, more and more products were over-design but didn't meet the basic daily use requirement and caused huge waste.

As a manufacturer, we developed 3 principles of LUSH which are we go green, user-friendly, and minimalist. The 3 principles guide us from product design to end-user delivery. Every piece of product we launched into the market is made under the 3 principles, and we hope more peers join us in this journey of being more social responsibility.

Overview

We Go Green

Yes, it is our first step, deciding to go green, now we need almost two planets to support our current consumption, and that's why the move to go green is more important than ever, especially as a manufacturer.

Reduce, Reuse, and Recycle is our first commitment in daily production and operation but also at the same time commit to the prevention of air, land, and water pollution. While we are working on energy saving equipment research and partner with suppliers who share the same commitment with us.

We are taking action now, not just making products responsibly and sustainably, also we want to be the part of building the better future.

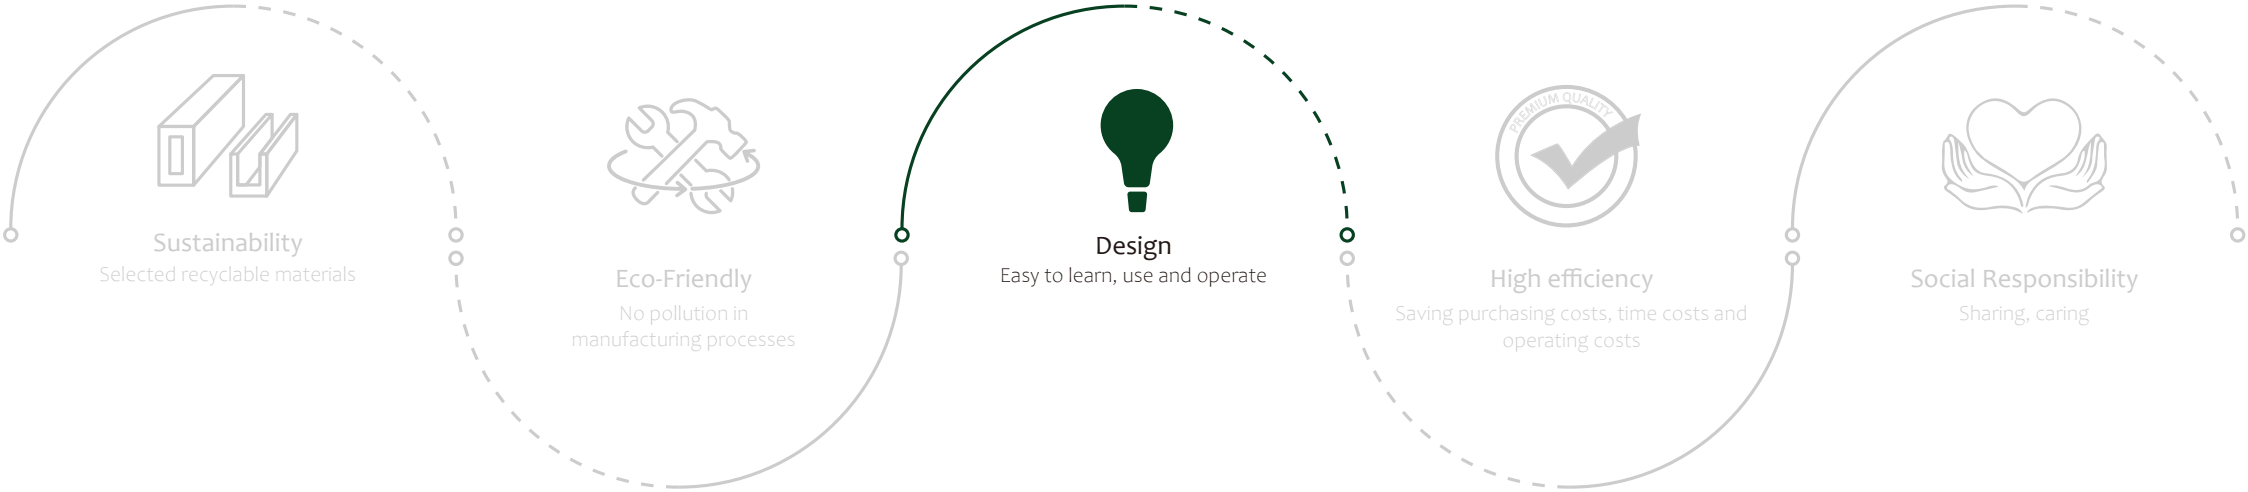

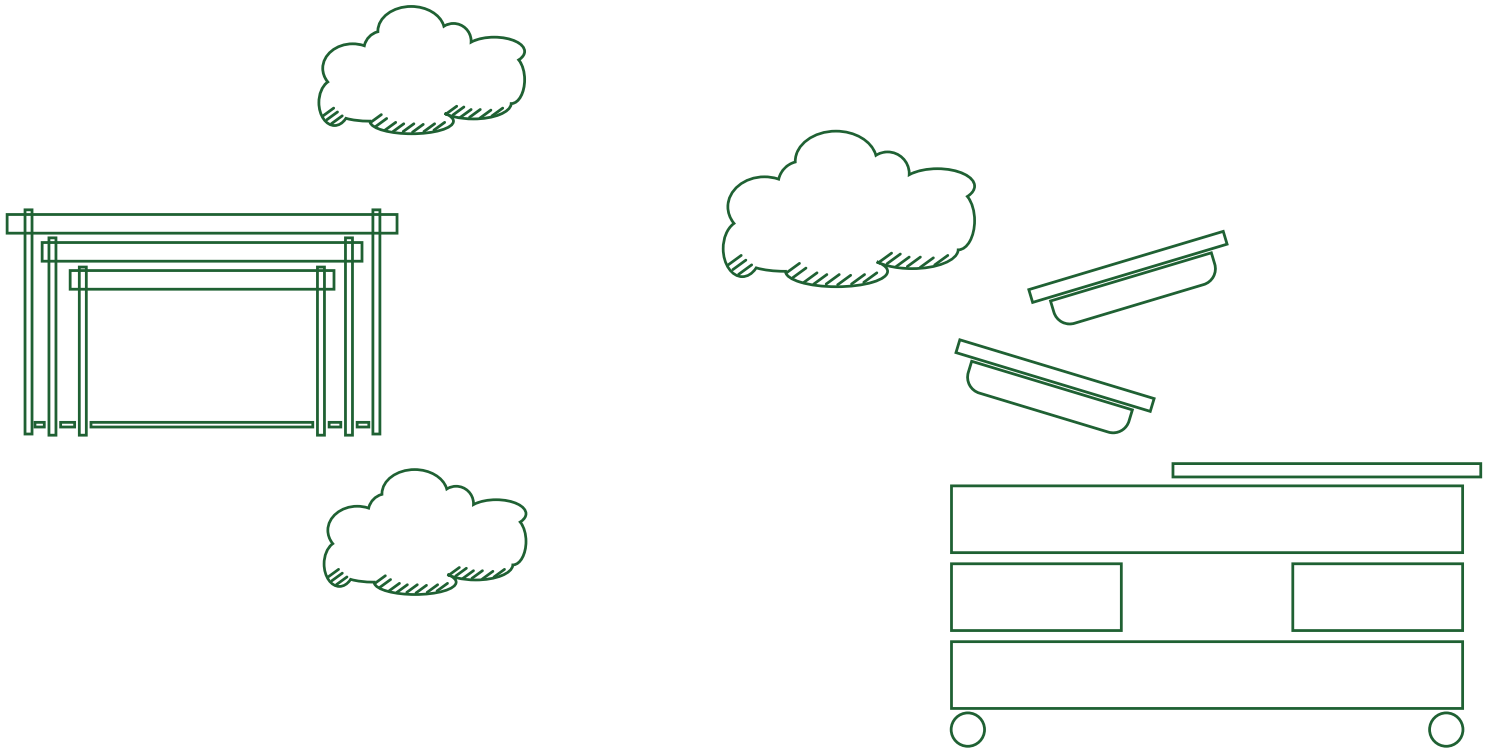

User-Friendly

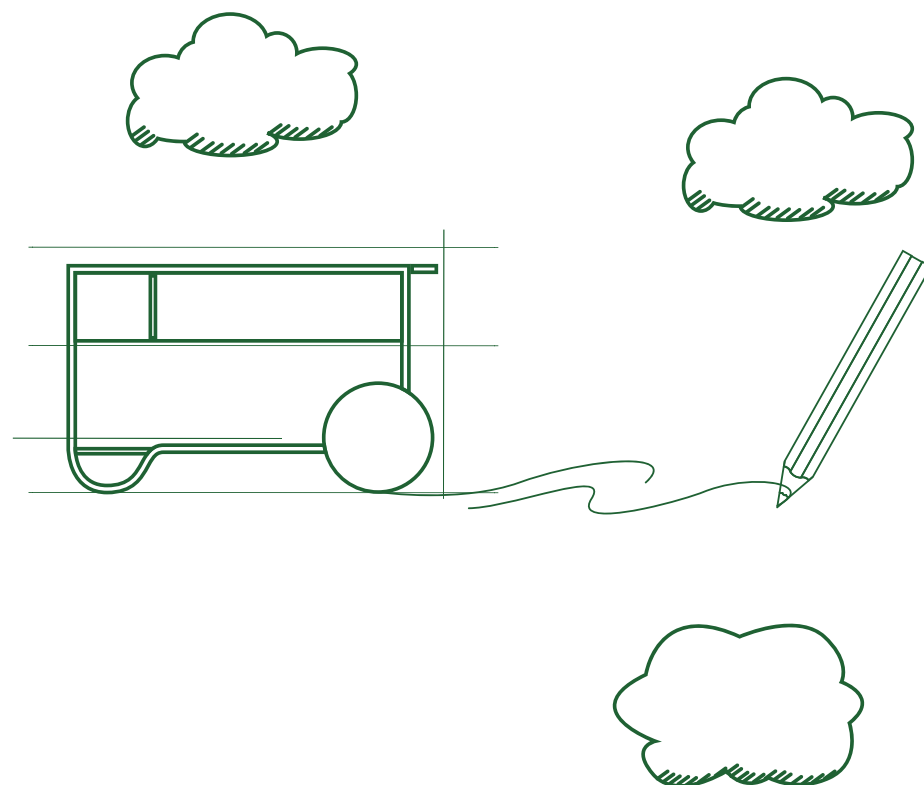

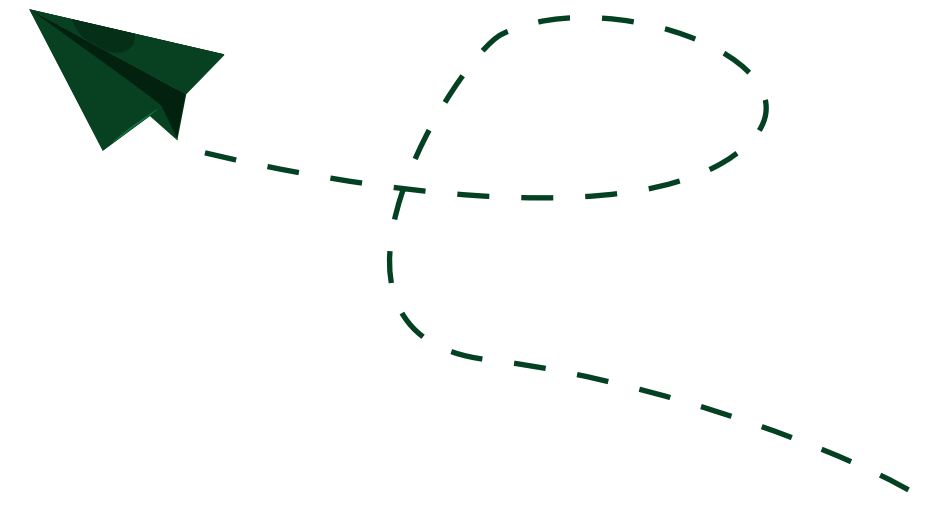

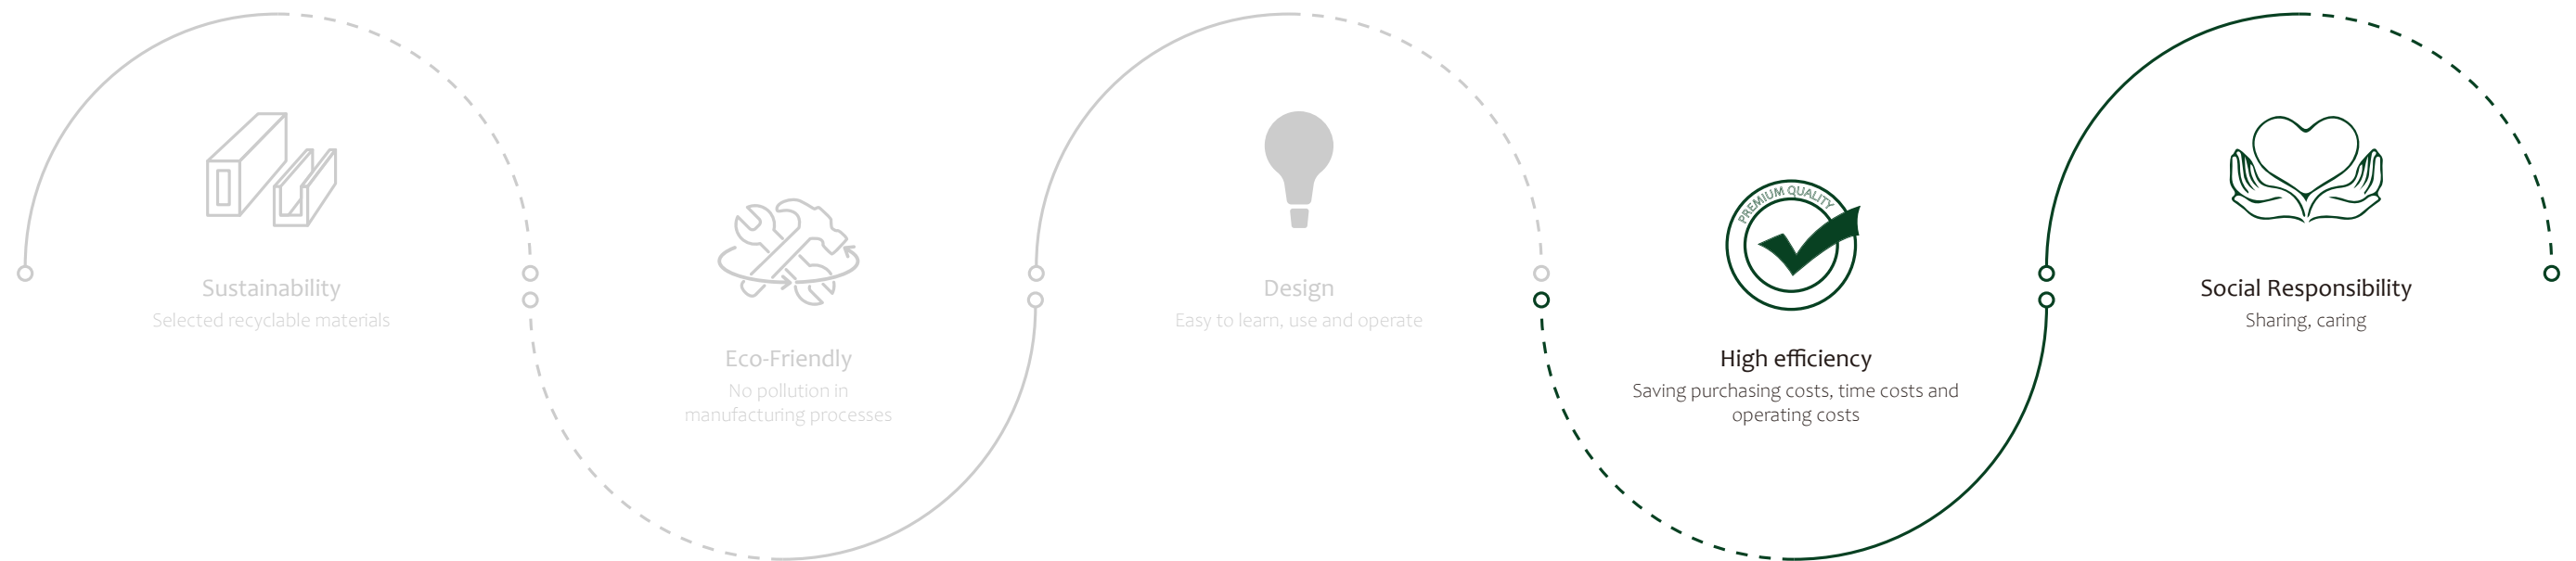

User-friendly is not only about the products, it is more related to the design concept.

User-friendly can only be met with full consideration of usage requirements and thoughtful design.

We don't produce any hollow-designed products that only look fancy or design too complicated to use, a good product should be simple to understand and easy to learn.

User-friendly is always our core design concept which drives us to explore more possibilities in multifunctional, space-saving, high efficiency, and better appearance on hospitality products.

Minimalist

It is all about what matters, we want to use the simplest and fewest elements to create the maximum effect. Nowadays the great imbalances of information and materials caused huge waste in some areas and famine in many others.

At LUSH, we don't encourage over-consumption, producing one piece of the user-friendly product means more than anything else to us. Owning only what adds value and removing the rest is our mission, we want to make the best use of what we produced that adds value to your daily operations. We save our customers purchasing costs, time costs, and operating costs.

High Efficiency

15s

One Step Folding

Flip & Go Dish Rack

High Mobility

One Step Folding

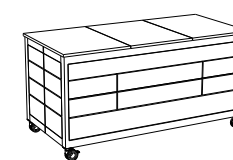

15s

- Fold frame in 15 seconds
- Fast setting up
- Improving operational efficiency
- Saving storage room

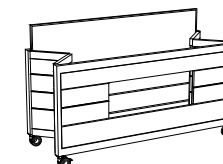

Top view

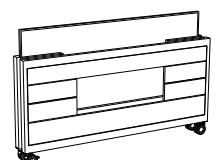

Front view

Step 1

Step 2

Step 3

High Efficiency

Flip & Go Dish Rack

- Dish rack preloaded and stored in the frame
- Special pneumatic bars support the rack
- Easy to set up and flip
- Saving efforts

Top view

Step 1

Step 2

Step 3

High Mobility

- Heavy-duty 3" swivel wheels
- Easy maneuverability at moderate speeds
- Hollow design, easy maintenance
- Better use indoor on flat surface or carpet
- Thermoplastic rubber, shock absorbed, non-marking and mute, resist most chemicals, oils, grease, and water splashing
- With lock brake

Safety

Water Resistance Body

Safety Circuits Design

Water Resistance Body

- No circuits built in, the body is not electrified
- HPL on water resistance plywood
- #304 SS frame, anti-rust
- Applicable to outdoor and indoor events

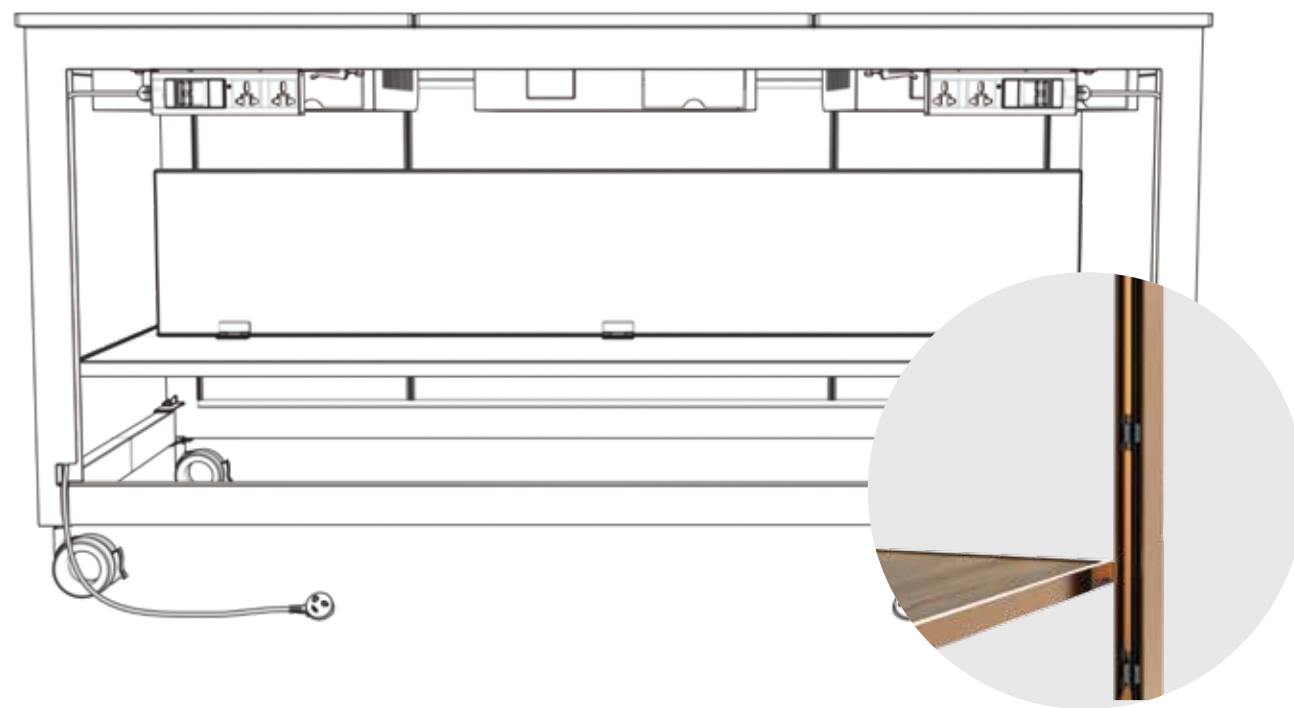

Safety

Circuits Design

- Open wire slot design for routine electrical checking
- 2 detachable reliable power distribution unit (PDU)
- Made for commercial grade catering equipment
- 2 cords, easy to manage

Open wire slot

Leakage and overload protection

Power Distribution Unit (PDU)

- 2 outlet in each PDU
- 8 foot(2.5M)cord compatible to AC power source
- Built-in circuit breakers protect connected equipment from dangerous overloads
- Leakage protector
- Rack mountable

120V-220V
4000W
